- CHANGES OF EVENT-RELATED POTENTIALS AS MARKERS OF EARLY BRAIN DAMAGE FOLLOWING IONIZING RADIATION. STATE OF THE ART AND FUTURE PERSPECTIVES
 Konstantin N. Loganovsky, Donatella Marazziti, Federico Mucci, Giulio Arcangeli, Nicola Mucci, Konstantin Kuts 353
- GOALS AND FUNCTIONS OF RUMINATION: A REVIEW
 Roberta Trincas, Chiara Schepisi, Estelle Leombruni, Valentina Emilia Di Mauro, Francesco Mancini 360
- CONSTRUCTION AND INITIAL VALIDATION OF A SCALE TO EVALUATE SELF-CARE PATTERNS: THE SELF-CARE SCALE
 Ana Isabel Gonzalez-Vazquez, Dolores Mosquera-Barral, Jim Knipe, Andrew M. Leeds, Miguel Angel Santed-German 373
- IDENTIFICATION OF SPECIFIC CORRELATIONS IN OBSESSIVE-COMPULSIVE DISORDER AMONG DIFFERENT MEASURES
 Giuseppe Femia, Federica Visco-Comandini, Teresa Cosentino, Flavia Sorbara, Andrea Gragnani 379
- SCHEMAS, MODES AND COPING STRATEGIES IN OBSESSIVE-COMPULSIVE LIKE SYMPTOMS
 Katia Tenore, Francesco Mancini and Barbara Basile 384

Clinical Neuropsychiatry

Journal of Treatment Evaluation

Bimonthly journal published by Giovanni Fioriti Editore srl

The aim of the journal is to critically (without ideological bias) evaluate the current achievements in every field of neuropsychiatry, particularly illness course and treatment effectiveness. It is very important to know how a patient could be defined as improved or recovered, how long a treatment has to last, when therapy works and for whom. These are fundamental issues for *Clinical Neuropsychiatry*.

The main goal of the journal is to collect original papers that directly or indirectly influence the effectiveness of a treatment, particularly focused on Evidence Based Medicine and Clinical Practice.

All papers in this journal are peer-reviewed. No person is permitted to take any role in the review of a paper in which they have an interest, e.g., fees or grants from, employment by, consultancy for, shared ownership in, any close relationship with, an organisation whose interests, financial or otherwise, may be affected by the publication of the paper.
